

# Hot Jazz and Cool Apps at CA-World 1998

**BE** sure to stop by the NaSPA booth, #108, while you're at CA-World 1998, Computer Associates' annual conference. This year's conference provides you an opportunity to take advantage of numerous educational opportunities as well as experience all that New Orleans offers.

## CA-World 1998

CA-World 1998 is unlike any other conference! It's all about hot jazz and cool apps. CA-World 1998 is one of the premier technology conferences in the industry and it's happening April 26 through May 1, 1998 in New Orleans.

## CA-World 1998: A Conference Within a Conference

At CA-World 1998, you will have a chance to preview some of the industry's hottest new technology. Unicenter TNG, the de facto enterprise management system, and the Internet's hottest multimedia application development and database technology, Jasmine, are being showcased at CA-World 1998.

We recommend picking a primary topic to be your central focus. This way, you can attend the sessions you want and meet with the experts in the areas in which you are interested. To help you with your selection, the following is a brief description of each conference. For more detailed information on these conferences visit our Web site at [www.caworld.com](http://www.caworld.com) or call (800)CAINFO98 (800-224-6369) or (516)342-6600.

## Enterprise Management

**GEM:** The Global Enterprise Management Conference (GEM) at CA-World 1998 is the premier conference for IT professionals interested in total enterprise management. GEM provides management solutions in systems and networking for heterogeneous as well as traditional mainframe environments. GEM also incorporates the major areas of enterprise management, including Change and Configuration, Help Desk, Output, Performance and Resource, Workload, and Storage. This is a great opportunity to learn about exciting new technologies and current advances in mainframe legacy solutions, such as CA-7, CA-Endevor, CA-1, and CA-MICS. You will also discover how CA is successfully integrating the legacy and heterogeneous environments with CA solutions, including the Windows NT-based Workstations and Web-based products such as CA-DocView/Web.

**Unicenter:** The Unicenter Conference is your chance to become completely immersed in the latest Unicenter TNG disciplines including Asset Management, Directory Management, Network Management, Agent Technology, Software Delivery, Enterprise Scheduling, Help Desk, Storage, Application and Database Management, and much more. You'll learn how to manage anything from anywhere with Unicenter — from the PC to the mainframe, to beyond

traditional IT boundaries — all can be managed from the office, home, or on the road over the Web.

**ESAC:** The Enterprise-Wide Security and Audit Conference (ESAC) offers more than 200 sessions covering all of today's security topics such as digital signatures, directory services, mainframe security, UNIX, Windows NT, and AS/400. Industry experts from all security and audit disciplines share their real-life experiences and provide practical advice for securing Internet/intranet, automating administration, launching in-house security awareness programs, and much more. Hands-on labs let you experience new, emerging technologies, including Unicenter TNG, the CA Security Workstations, the latest firewalls, and security surveillance toolkits.

**opsXchange:** The opsXchange Conference is an automation user conference emphasizing event management across the enterprise for both MVS mainframes and distributed computing. At opsXchange you will gain insight into Computer Associates' automation technology.

Highlighted at the opsXchange Conference are CA's strategic automation products for enterprise-wide automation — CA-OPS/MVS II, Unicenter TNG Automation Point Option, and Unicenter TNG MVS Event Manager Option — and their integration with Unicenter TNG.

## Application Development

**ADC:** The Application Development Conference (ADC) at CA-World 1998 is a technical conference geared toward all information technology professionals, especially those who develop and maintain applications and those who face critical Year 2000 issues.

ADC explores the latest in application trends across a broad spectrum, from traditional mainframe-based applications to state-of-the-art client/server applications such as Jasmine and Opal, that exploit the power of multimedia, as well as the Internet and intranet. Designed to both educate and inform IT professionals, ADC provides a unique opportunity to experience hands-on training and learn first-hand how others have implemented CA solutions to meet their business needs.

**TechniCon:** TechniCon addresses the challenges of a technologically complex world, exploring such leading-edge technologies as object-oriented programming and databases, OLE, ActiveX, 32-bit operating systems, client/server development, multi-tier applications, and graphical user interfaces (GUIs). Additionally, there will be a wide selection of user symposiums and hands-on workshops, along with question and answer panels for exploring timely and topical issues. TechniCon 1998 will add a new dimension of knowledge for all your needs, including converting CA-Visual Objects code to Jasmine. Experience the technology for both the novice and the experienced developer.

### Database Management

**CADRE:** CADRE at CA-World 1998 arms you with first-hand information about the best ways to leverage your investment in CA-Datcom and CA-Ideal systems, as well as provides experience with the latest tools and techniques available in the industry. Additionally, CADRE provides an outstanding opportunity to learn up-to-date information about CA-Datcom from other users as well as senior CA developers.

At CADRE you will have the opportunity to network with your peers and CA development and support personnel. CADRE schedules Special Interest Group meetings, sets aside designated tables during lunch, and provides special meeting areas in the Technical Campground so attendees can debate and discuss their common interests.

**IMC:** The Information Management Conference (IMC) at CA-World 1998 provides the opportunity for Information Technology and Business User professionals to educate themselves on the current status and latest plans for the CA-IDMS and CA-CAS product families. Attendees at IMC will learn how to effectively exploit current and emerging technologies to meet their business needs of today and tomorrow.

Other sessions educate users in exciting new technology opportunities such as Jasmine and Opal, CA's exciting Internet-enabling products, multi-platform data sharing, and replication.

**Ingres World:** Ingres World provides the ideal opportunity to catch up on the latest enhancements and to plan for the future. This year's conference offers hundreds of sessions designed to deliver detailed information on the latest releases of OpenIngres and OpenROAD, as well as future plans.

Other sessions educate users in exciting new technology opportunities such as Jasmine, the Internet's hottest multimedia application development and database technology.

**Jasmine:** The Jasmine Conference at CA-World 1998 explores the business and technology opportunities that Jasmine presents. Jasmine offers the power and robustness of a pure object database, combined with an integrated development tool, built-in multimedia support, and the openness to integrate with existing applications and data. You'll have the opportunity to attend technical sessions geared to all levels of Jasmine expertise.

Take a tour of the World Resource Center to view demonstrations of "Jasmine @ Work," participate in a hands-on workshop to learn the basics of the Jasmine Application Development and meet with technicians from the Jasmine development and support teams to ask questions, share ideas, and offer suggestions.

### CA Business Partners

**Channel Partner:** The Channel Partner Conference at CA-World 1998 is a unique opportunity for worldwide business partners to strengthen strategic relationships, explore new technology, increase profitability, and maximize their partnership potential. Learn how Computer Associates plans to enhance this partnership with details on upcoming product direction, Partner Program changes, and ongoing channel support. The Channel Partner Conference offers a global sales vision and a focus on the tools needed for optimum growth combined with the opportunity to attend any of hundreds of CA-World 1998 presentations and experience state-of-the-art technology in the World Resource Center.
